

K5® LIPOGEL

Synergic effect

"Erases spots"

**Anti-brown spots
skin depigmenting Lipogel**

LIPOGEL pidobenzone-based depigmenting preparation for **Dermocosmetic Decolouring Treatment** of skin brown spots.

K5[®] Lipogel

Dual Objective:

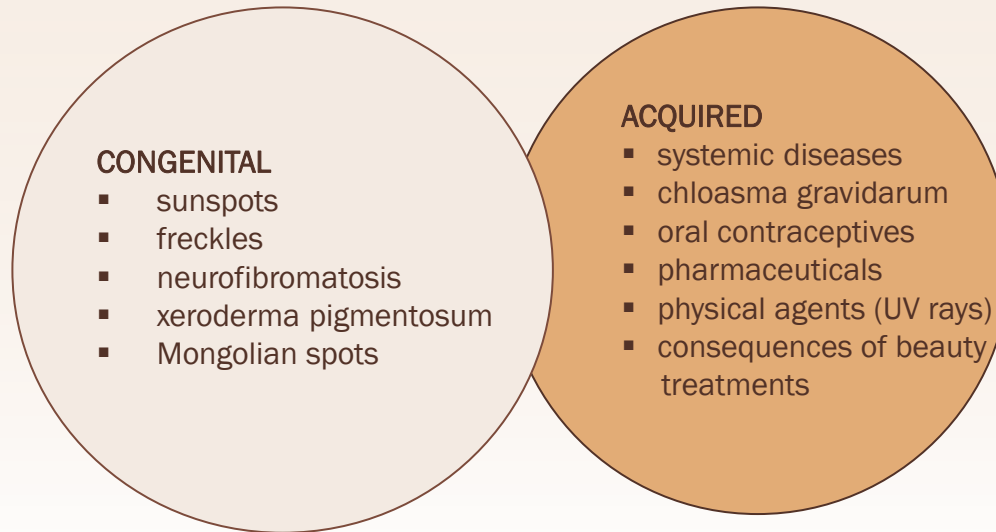

- improved patient compliance
- increased skin bioavailability

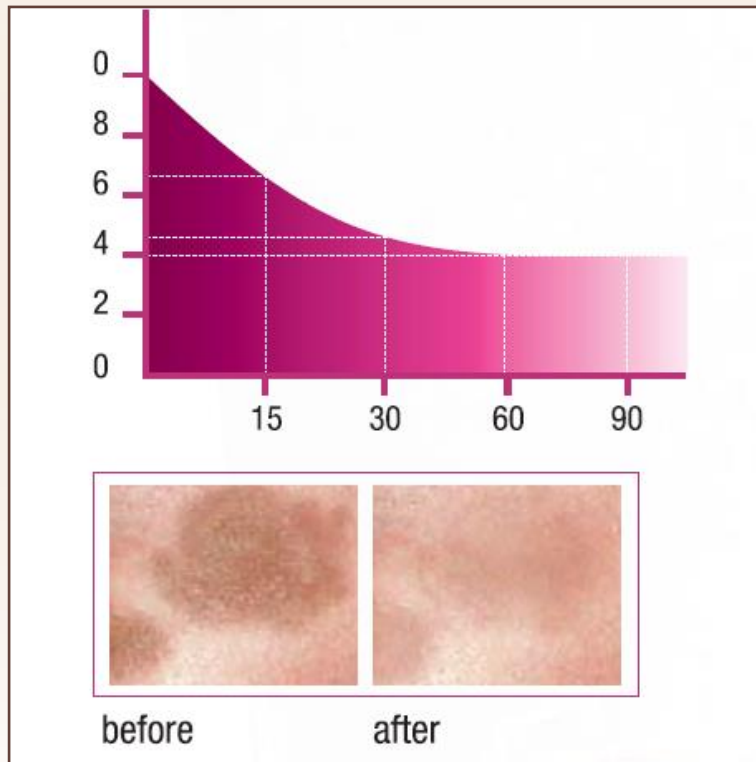

K5® LIPOGEL topical treatment of hyperchromatic dyschromia

The excessive deposits of melanin are diffused or localised mainly on the face, neck and hands, resulting in **aesthetical and psychological discomfort.**

Various conditions are responsible for an abnormal increase in pigmentation resulting in the appearance of “brown spots” on the skin.

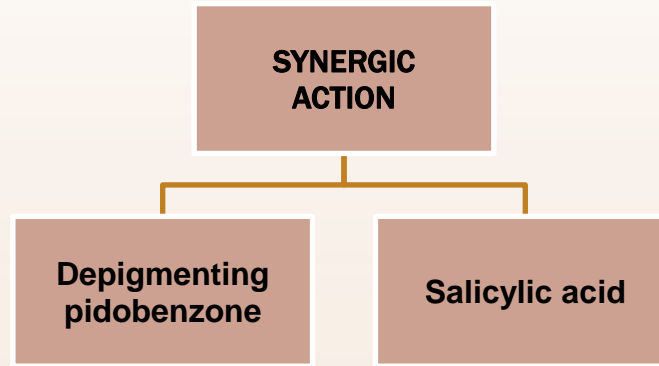

The results of clinical tests have shown that K5® Lipogel topical treatment based on 4% Pidobenzone, the patented active ingredient, possesses a depigmenting activity.

Experimental method, with colour distribution histogram determination, in RGB format, of a detail of the spot, before and 90 days after application of the product.

K5[®] LIPOGEL patented formula

- Local inhibition of melanogenesis
- Gentle keratolytic exfoliant
- Biopeeling

The lipogel base ensures **faster absorption** and better compliance of the application.

Micronization of Pidobenzone ensures its optimal distribution in the carrier and **accelerates its absorption, improving the skin's bioavailability.**

Number of irritative reactions observed 15 minutes and 24 hours after removal of the test patch

K5® LIPOGEL SYNERGIC EFFECT “Erases spots”

K5® LIPOGEL SYNERGIC ACTION

Depigmenting
Pidobenzone

Salicylic acid

Suggested use:

Cleanse thoroughly area to be treated and apply, twice a day, a sufficient amount of K5® with a soft massage until the product is totally absorbed.

Apply before make-up.

We recommend the use of K5® for six/eight weeks, in order to stabilize its depigmenting action, even if significant results could be already obtained after three/four weeks.

Composition:

Dicaprylyl Ether, C-12-15 Alkyl Benzoate, Cyclopentasiloxane, Zea Mays (Corn) Starch, Pidobenzone, Ethylhexyl Methoxycinnamate (Octyl Methoxycinnamate), Hydrogenated Castor Oil, Silica, Polyglyceryl-3 Beeswax, Distearidimonium Hectorite, Tocopheryl Acetate, Phenoxyethanol, Parfum (Fragrance), Olea Europaea (Olive) Extract, Canola Oil, Salicylic Acid, Methylparaben, Propylene Glycol, Butylparaben, Ethylparaben, Propylparaben, Rosmarinus Officinalis (Rosemary) Extract, Ci 14700 (Red 4).

Caution:

For external use only. Avoid contact with eyes.

Apply only to small areas. In case of irritation, discontinue use.
